DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5, 8 and 16 are rejected under 35 U.S.C. 102(b) as being anticipate by Litton (Des. 392,419).

Regarding claims 1, 5 and 16, Litton teaches a nail clipper comprising top and bottom elongated members, a post, a lever and a bumper on a bottom surface of the bottom member. See Fig. 1.

Regarding claim 8, the cutting edges are at an angle of 90 degrees with respect to a central longitudinal axis of the top and bottom elongated members.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 6, 7, 16, 17, 19, 20 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsay (5,063,666) in view of Litton (Des. 392,419).

Regarding claims 1, 16, 17, 19 and 22, Tsay teaches a nail clipper comprising top 31 and bottom 3 elongated members, a post 4 and a lever 2. See Fig. 1.

Tsay fails to teach providing a bumper on a bottom surface of the bottom member. Litton teaches providing a bumper on a bottom surface of the bottom member for comfortably gripping. Therefore, it would have been obvious to one skilled in the art to provide a bumper as taught by Litton on a bottom surface of the bottom member of the Tsay's nail clipper for comfortably gripping.

Regarding claim 6, Tsay teaches the invention substantially as claimed except for a thumb accept depression on the lever. Litton teaches a thumb accept depression on the lever. See Fig. 1. Therefore, it would have been obvious to one skilled in the art to provide a thumb depression as taught by Litton on the lever surface of the Tsay's nail clipper for comfortably gripping.

Regarding claim 7, cutting edges of the Tsay's nail clipper are at an angle with respect to a central longitudinal axis of the elongated member.

Regarding claim 20, the bumper is best seen in Fig. 1 in Litton.

Response to Arguments

5. Applicant's amended claim 1 and newly added claim 22 filed 09/28/2006 have been fully considered but they do not overcome the applied prior art as shown above.

Conclusion

Art Unit: 3724

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
